Spinal Cord Injury Statistics. John S. Young, Peter E. Burns, A.M. Bowen, and Roberta McCutchen, with an introduction by J. Paul Thomas. Spinal Cord Injury Statistics, Good Samaritan Medical Center, 1130 E. McDowell Road, Suite A-7, Phoenix, Arizona 85000-2675. 154 pages. \$25.

The Rehabilitation Services Administration began developing a Regional Model Spinal Cord Injury System in 1970. Seventeen systems ultimately were sponsored, and this book reflects their experiences from 1973 through 1981.

In 1975, the National Spinal Cord Injury Data Research Center was established at Good Samaritan Medical Center, to collect and analyze standardized data supplied by the regional systems. Data for over 6,000 cases were prospectively reported, providing information on the demography, etiology, and medical/social outcomes of spinal cord injury. Data were obtained for 6 years following injury.

A major portion of the statistical information produced by the project

is presented here. This book is designed as a reference for those who have an interest in, and responsibility for, the care of the spinal cord injured.

Independent Living With Attendant Care. Set includes "A Guide For The Person With A Disability" (20 pages), "A Guide For The Personal Care Attendant" (24 pages), and "A Message To Parents Of Handicapped Youth" (12 pages). ILRU, P.O. Box 20095, Houston, Texas 77225. \$3.50 each or \$10.50 for set.

As the individual titles indicate, different aspects of attendant care are explored, but the focus is upon effective working relationships rather than on tasks to be performed.

While their intended audience is obvious, the set could be of interest to people working in the program and other rehabilitation professionals and agencies.

Rights of Passage. 3/4" U-matic, 1/2" Beta or VHS. Objectif, P.O. Box 4743 Berkeley, California 94704.

(Study guide included.) Color. 58 1/2 min. Rental, \$75 per day; sale, \$395 and \$5 shipping and handling.

"An unusually frank, aggressive, and effective use of video to present handicapped individuals demanding their rights to be independent, to be human, and to have equal access to those opportunities available to the nonhandicapped . . . technically and stylistically superior to most," *Choice Magazine*, American Library Association.

Handbook For Job Placement Of Mentally Retarded Workers. Third Edition. Angeline M. Jacobs, Judith K. Larsen, and Claudette A. Smith. The Ware Press, P.O. Box 397, Cambridge, Massachusetts 02238-0397. 324 pages. \$27.95.

This book's purpose is to facilitate integrating mentally retarded people into the competitive world of work. It presents sections on the mentally retarded worker, prevocational evaluation and training, vocational training, placement procedures, and job profiles.
